In the Matter of the Search of

(Name, address or brief description of person or property to be searched)

CLERK, U.S. DISTRICT COURT
SOUTHERN DISTRICT OF CALIFORNIA

10241 Eagle Rock Avenue

San Diego, California

BY:

DEPUTY

APPLICATION AND AFFIDAVIT
FOR SEARCH WARRANT

CASE NUMBER:

07 MJ 2741

I, John Gieson, being duly sworn depose and say:I am a(n) Special Agent with the Drug Enforcement Administration and have reason to believe that on the person of or XX on the property or premises known as (name, description and/or location)

10241 Eagle Rock Avenue, San Diego, California

(Attachment A)

in the SOUTHERN District of CALIFORNIA
there is now concealed a certain person or property, namely (describe the person or property)See Attachment B

which is (state one or more bases for search and seizure set forth under Rule 41(b) of the Federal Rules of Criminal Procedure)

Evidence of the commission of a criminal offense concerning violations of Title 21, United States Code, Sections 841(a)(1) and 846, and Title 18, United States Code, Section 1956.

The facts to support a finding of Probable Cause are as follows:

See Attached Affidavit.

Continued on the attached sheet and made a part thereof. X Yes No

Signature of Affiant

Sworn to before me, and subscribed in my presence

Date 11/21/07 at San Diego, CA
City and StateName and Title of Judicial Officer

1
2 3. In preparing this affidavit, I have conferred with other special agents and law
3 enforcement officers who have experience conducting investigations regarding the cultivation of
4 marijuana. Furthermore, I have personal knowledge of the following facts or have been informed of
5 them by others.

6 II

7 LOCATIONS TO BE SEARCHED

8 4. This affidavit is submitted solely for the purpose of establishing probable cause to scan
9 each premises located at (1) 1621 Montgomery Drive, Vista, California (hereinafter "**1621**
10 **Montgomery Drive**"); (2) 3220 Gopher Canyon Road, Vista, California (hereinafter "**3220 Gopher**
11 **Canyon Road**"); (3) 10241 Eagle Rock Avenue, San Diego, California (hereinafter "**10241 Eagle Rock**
12 **Avenue**"); and (4) 8539 Aquarius Drive, San Diego, California (hereinafter "**8539 Aquarius Drive**"),
13 including all attached and unattached rooms, attics, basements, garages (including vehicles parked
14 therein), storage areas, safes, briefcases, containers, trash areas within the residence, surrounding
15 grounds and outbuildings assigned to or part of to these four locations. The locations are further
16 described in Attachment A.

17 5. This affidavit does not contain all of the information known to law enforcement regarding
18 this investigation, but rather contains only those facts believed to be necessary to establish probable
19 cause to search the locations listed above in paragraph 4. Based upon my training and experience, my
20 review of documents and other relevant information I believe to be reliable, witness interviews, and
21 discussions with other agents from the DEA, the United States Internal Revenue Service ("IRS"), I
22 submit that the facts contained in this affidavit demonstrate that there is probable cause to believe that
23 evidence of violation of Title 21, United States Code, Sections 841(a)(1)/846 and 841(a)(1)
24 (manufacture of a controlled substance, to wit, marijuana and marijuana plants) and Title 18, United
25 States Code, Section 1956 (money laundering), including items listed in Attachment B, will be found
26 at: (1) **1621 Montgomery Drive**; (2) **3220 Gopher Canyon Road**; (3) **10241 Eagle Rock Avenue**;
27 and, (4) **8539 Aquarius Drive**.

III

FACTS ESTABLISHING PROBABLE CAUSE

BACKGROUND OF INVESTIGATION

7. In June 2007, your affiant interviewed a Source of Information (SOI) who related that an individual named Seth Venskus (hereinafter "Venskus") was known to grow marijuana indoors. The SOI believed that Venskus lived in San Marcos, but had heard through mutual acquaintances that the indoor grow house was possibly in the Mira Mesa or Clairemont areas of San Diego. The SOI previously purchased personal amounts of marijuana from Venskus. The SOI was not aware of where Venskus currently resided and did not know the specific location of where Venskus grew and manufactured marijuana. SOI is not a percipient witness to Venskus' marijuana grows.

8. The SOI is currently facing charges in an open criminal prosecution, but has agreed to cooperate with law enforcement. No promises have been made to the SOI in exchange for her/his cooperation other than the amount and degree of the cooperation will be made known to the prosecutor, who may then be inclined to recommend some kind of sentencing consideration. The SOI has entered a guilty plea in federal court to manufacturing marijuana plants (an offense that is a 5-year minimum mandatory) and is awaiting sentencing. Despite these pending charges, I believe the SOI information is accurate because the information given to me was corroborated by other law enforcement sources and me.

9. I desire to keep the SOI confidential because she/he has requested me to do so; because it is my training and experience that such SOI's suffer physical, social or emotional retribution when their identities are revealed; because it is my experience that to reveal the identity of such SOI's seriously impairs their utility to law enforcement; and because it is my experience that revealing the identity of such SOI's dissuades other citizens from disclosing confidential information about criminal activities to law officers. The SOI is not a percipient witness of any of the events.

10. Pursuant to the information from the SOI, I subsequently queried Venskus' name into a law enforcement database and learned Venskus' name had been previously entered by San Diego County Sheriff's Detective Tim Dinger. I spoke to Detective Dinger, who told me that in August 2006, he received a citizen's complaint of possible narcotic activity taking place at 337 Morgan Place, Vista,

California (hereinafter "337 Morgan Place"). He spoke to the citizen who told him he/she believed that Seth Venskus was possibly selling narcotics out of the residence of 337 Morgan Place. The citizen further provided Detective Dinger with multiple California license plates that the citizen believed were involved with the narcotic activity. Detective Dinger investigated the information but was not able to develop any actionable leads.

1621 MONTGOMERY DRIVE INVESTIGATION

11. I reviewed subpoenaed records from San Diego Gas & Electric (hereinafter "SDG&E") which show that Seth Venskus is the current utility subscriber at **1621 Montgomery Place**, and has been since April 1, 2007.

12. The following table shows the electrical usage history, in kilowatt-hours per month, at **1621 Montgomery Drive**, along with four comparable neighborhood residences. I have personally seen these residences used for comparison purposes in the neighborhood and they appear to be similar in size and construction to the residence at **1621 Montgomery Drive**.

AMOUNT OF KILOWATTS UTILIZED

DATE	1621	XXX	XXX	XXX	XXX
	<u>Montgomery</u>	<u>Montgomery</u>	<u>Montgomery</u>	<u>Montgomery</u>	<u>Montgomery</u>
10/07	1776	294	235	477	661
09/07	1578	649	264	500	818
08/07	2250	1133	202	505	710
07/07	2311	1198	249	505	627
06/07	2478	685	320	593	726
05/07	2257	563	252	422	609
04/07	1515	406	260	462	633

13. Based on my training and experience, it is my opinion that the electrical usage at **1621 Montgomery Drive** shows high energy use that is consistent with the amount of electricity required to operate the equipment commonly used for indoor marijuana cultivation, namely, but not limited to, high wattage lights, circulation fans, exhaust blowers, and pump systems. I observed nothing from the

outside of the structure that could lead me to account for the high electrical usage.

14. On August 9, 2007, a magnetic Global Positioning System (GPS) vehicle tracker was placed on a 1999 Ford F-250 pick-up truck bearing California license plate 7L21211, registered to Venskus at 337 Morgan Place (hereinafter "Venskus' truck"). The GPS tracker was placed on Venskus' truck while it was parked in the drive way of 337 Morgan Place. Subsequent battery changes of the magnetic GPS vehicle tracker took place while Venskus' truck was parked in a public place or in the driveway of his residence at 337 Morgan Place. The driveway entrance to 337 Morgan Place is not gated and there is no signage denoting "no soliciting" or "no trespassing." The GPS tracker on Venskus' truck shows that Venskus likely resides at 337 Morgan Place because the truck returns to the address every night. However, the GPS tracker also shows that Venskus' truck frequently travels to the area of **1621 Montgomery Drive**, which I believe is a marijuana grow location as further discussed below, and would eventually return to 337 Morgan Place. When conducting physical surveillance in conjunction with the GPS tracker, on multiple occasions, I and other agents have observed Venskus driving his truck. Below is a chart depicting information received from the GPS tracker on Venskus' truck demonstrating that he frequently travels to the areas of **1621 Montgomery Drive** as well as **3220 Gopher Canyon Road**^{1/} which I believe is a marijuana grow location as further discussed below.

<u>MONTH</u>	<u># OF TIMES TRAVELED TO THE AREA OF 1621 MONTGOMERY</u>	<u># OF DAYS TRACKED IN MONTH</u>
August	10	15
September	23	27
Octobe	8	30
November (1-20)	9	20

^{1/} These GPS charts contained in this affidavit do not represent all of the information gathered from the tracking device, but only the information necessary to establish probable cause for the locations being searched.

<u>MONTH</u>	<u># OF TIMES TRAVELED TO THE AREA OF 3220 GOPHER CANYON</u>	<u># OF DAYS TRACKED IN MONTH</u>
August	5	15
September	9	27
October	8	30
November (1-20)	12	20

15. Venskus also has a 2000 blue-colored Jeep Cherokee bearing California license plate 5NGU289, registered to Venskus at 337 Morgan Place. On August 23 and October 12 and 30, 2007, I observed Venskus' jeep parked in the driveway of **1621 Montgomery Drive**. On July 23 and October 2, 2007, I observed the Vensku's jeep parked in the driveway of **3220 Gopher Canyon Road**. I conducted physical surveillance on several occasions during this time frame.

16. On November 8, 2007, a magnetic Global Positioning System (GPS) vehicle tracker was placed on a 2000 Jeep Cherokee bearing California license plate 5NGU289, registered to Venskus at 337 Morgan Place (hereinafter "Venskus' jeep"). The GPS tracker was placed on Venskus' jeep while it was parked in the drive way of 337 Morgan Place. Subsequent battery changes of the magnetic GPS vehicle tracker took place while Venskus' jeep was parked in a public place or in the driveway of his residence at 337 Morgan Place. The GPS tracker on Venskus' jeep shows that Venskus likely resides at 337 Morgan Place because the jeep returns to the address every night. However, the GPS tracker also shows that Venskus' jeep frequently travels to the area of **1621 Montgomery Drive** and would eventually return to 337 Morgan Place. When conducting physical surveillance in conjunction with the GPS tracker I and other agents have observed Venskus driving his jeep. Below is a chart depicting information received from the GPS tracker on Venskus' jeep demonstrating that he frequently travels to the areas of **1621 Montgomery Drive** as well as **3220 Gopher Canyon Road**:

//

//

<u>MONTH</u>	<u># OF TIMES TRAVELED TO THE AREA OF 1621 MONTGOMERY</u>	<u># OF DAYS TRACKED IN MONTH</u>
--------------	---	-----------------------------------

November	5	14
----------	---	----

<u>MONTH</u>	<u># OF TIMES TRAVELED TO THE AREA OF 3220 GOPHER CANYON</u>	<u># OF DAYS TRACKED IN MONTH</u>
--------------	--	-----------------------------------

November (1-20)	1	14
-----------------	---	----

17. In addition, I believe that Venskus frequents **1621 Montgomery Drive** and **3220 Gopher Canyon Road** properties because in my training and experience, indoor marijuana cultivation operations require regular maintenance to ensure that the marijuana plants are growing healthy and that the equipment (such as lights, fans, irrigation systems, etc.) is operating properly. Some marijuana grows require daily maintenance, while other grows require maintenance 2-3 times each week. If a malfunction occurred with any equipment and the problem was not rectified immediately, it would effect the growth of the marijuana plants resulting in the ultimate loss of product and therefore decreasing the profitability.

18. Based on my training and experience, it is common for persons who operate clandestine indoor marijuana cultivation operations to reside in a separate residence while maintaining the cultivation operations at other locations. This is done to minimize their involvement in the cultivation operations and insulate themselves if law enforcement discovers the cultivation operation location.

19. On October 12, 2007, at approximately 11:05 a.m., the GPS tracker indicated Venskus' truck arrived in the area of HydroBrew located at 1319 S. Coast Highway 101, Oceanside, California. HydroBrew has been identified by the DEA as supplying equipment used for the cultivation of marijuana. At 11:10 a.m., a DEA Task Force Agent (TFO) observed Venskus exit HydroBrew carrying a bag of grow rocks and place it in the bed of the pick-up truck, re-enter the store, and exit again with an additional bag of grow rocks and a brown paper bag. Venskus placed the second bag of grow rocks

1
2 into the bed of the pick-up truck and the brown paper bag into the cab of the truck. Grow rocks are a
3 growing medium used in lieu of dirt commonly used in the cultivation of marijuana. Venskus was
4 subsequently followed by agents directly to **1621 Montgomery Drive**. I believe that Venskus was
5 replenishing supplies needed in the ongoing cultivation of marijuana grow.
6

7 20. On October 30, 2007, at approximately 11:19 a.m., I observed Venskus and another
8 individual, Michael Druker, depart from **1621 Montgomery Drive** in Venskus' Jeep Cherokee. They
9 were followed directly to HydroBrew, both entering the store. Michael Druker exited carrying a box and
10 Venskus exited carrying two brown bags. They were then followed directly back to **1621 Montgomery**
11 **Drive**.
12

13 21. On November 14, 2007, I applied for and was granted State of California scan warrant
14 #503-07 by San Diego County Superior Court Judge Joel Pressman, authorizing a Forward Looking
15 Infrared (FLIR) scan of **1621 Montgomery Drive**. This device is a passive, non-intrusive system which
16 detects differences in temperature of an object being observed. This system does not send any beams
17 or rays into an area, nor does it enter any structured area. The system only detects differences in the
18 surface temperatures of an object. The use of this device in the early morning or late evening hours,
19 without solar loading (sunshine), will highlight man-made heat sources as a white color and cooler
20 temperatures by shades of gray. Similar devices such as this have been used with other applications
21 such as locating missing persons in a forest, identifying inefficient building insulations, detecting hot
22 overloaded power lines, and detecting forest fire lines through smoke.
23
24

25 22. On November 15, 2007, pursuant to the state FLIR scan warrant, San Diego Police
26 Officer Kevin Means, who is assigned to the San Diego Police Department's aviation unit as a Tactical
27 Flight Officer (TFO), conducted this FLIR. Officer Means is also a certified thermographer. I have been
28 advised of the qualifications of Officer Means as described in Attachment C, which is filed in

1
2 conjunction herewith and incorporated by reference herein. After reviewing the video of the FLIR,
3 Officer Means opined there was an area of the roof, in the center of the house, on the backside of the
4 house that was emitting an unusual amount of heat. Warm rooftops are commonly found at indoor
5 marijuana grow houses. Officer Means was not able to detect any other heat anomalies that would
6 indicate the presence of an indoor marijuana grow. Officer Means concluded that the FLIR scan was
7 inconclusive as to the presence of an indoor marijuana grow.
8

9 23. Although the FLIR scan did not detect sufficient heat anomalies associated with indoor
10 marijuana cultivator, it does not preclude the possibility the house is being used to cultivate marijuana
11 especially given the high electricity usage combined with other factors. Based on my training and
12 experience, marijuana cultivators are often aware of the techniques and tools used by law enforcement
13 to detect their marijuana cultivation operations. They learn these techniques from other marijuana
14 cultivators and trade publications such as "High Times" magazine. For example, they are told not to
15 discard the unused portions of the marijuana plant in their trash because they know law enforcement
16 conducts trash searches. When purchasing equipment from hydroponic stores, they are told to use
17 different vehicles and not to drive directly back to their marijuana cultivation location because law
18 enforcement conducts surveillance at these hydroponic stores. Likewise, they are also taught ways of
19 defeating the FLIR scans. For example, marijuana cultivators may operate their heat generating
20 equipment during the day-time hours when FLIR scans can not be used. Marijuana cultivators can also
21 insulate the rooms that are being used. They can also direct the venting to other locations, such as a
22 fireplace chimney.
23
24

25 **3220 GOPHER CANYON ROAD INVESTIGATION**

26
27 24. In reviewing the subpoenaed records obtained from SDG&E regarding 1621
28 Montgomery Drive, I noticed the prior utility subscriber to Venskus was Michael Druker from October
5, 2005 to April 25, 2007.

25. The SOI further related that she/he had purchased marijuana from Michael Druker on many occasions but estimated the last purchase was at least a year and a half ago. During this time frame, Michael Druker told the SOI that he was purchasing indoor grown marijuana from Venskus.

26. I obtained further subpoenaed records from SDG&E, which revealed that Michael Druker is the current utility subscriber at **3220 Gopher Canyon Road**, since November 17, 2006 to the present.

27. The following table shows the electrical usage history in kilowatt-hours per month at **3220 Gopher Canyon Road**, along with four comparable neighborhood residences. I have personally seen these residences used for comparison purposes in the neighborhood and they appear to be similar in size and construction to the residence at **3220 Gopher Canyon Road**.

AMOUNT OF KILOWATTS UTILIZED

DATE	3220	XX	XXX	XXX	XXX
	<u>Gopher Can</u>	<u>Gopher Can</u>	<u>Gopher Can</u>	<u>Gopher Can</u>	<u>Gopher Can</u>
10/07	2697	472	1592	345	831
09/07	2398	533	2321	397	828
08/07	1935	494	2707	403	951
07/07	3644	264	2278	452	902
06/07	2084	444	1511	364	862
05/07	3224	479	1562	263	849

02/07	1777	29	1602	322	1206
01/07	1022	48	1584	447	1463
12/06	518	558	1477	360	1156

28. Based on my training and experience, it is my opinion that the electrical usage at **3220 Gopher Canyon Road** shows excessive energy use that is consistent with the amount of electricity

required to operate the equipment commonly used for indoor marijuana cultivation, namely, but not limited to, high wattage lights, circulation fans, exhaust blowers, and pump systems. I observed nothing from the outside of the structure that could lead me to account for the extremely high electrical usage.

29. On October 17, 2007, a magnetic GPS vehicle tracker was placed on a 1999 Ford F-350 pick-up truck bearing California license plate 7S4520, registered to Michael D. Druker at **1621 Montgomery Drive** (hereinafter "Druker's truck"). The GPS tracker was placed on Michael Druker's truck while it was parked in a public parking lot. Subsequent battery changes of the magnetic GPS vehicle tracker took place while Michael Druker's truck was parked in a public place or while parked in the drive way of **1621 Montgomery Drive**. The driveway entrance to **1621 Montgomery Drive** is not gated and there is no signage denoting "no soliciting" or "no trespassing." Physical surveillance since August 2007 and the GPS tracker on Druker's truck shows that Michael Druker resides at **3220 Gopher Canyon Road**. However, the GPS tracker also shows that Michael Druker frequently travels to the area of **1621 Montgomery Drive**. When conducting physical surveillance in conjunction with the GPS tracker, I and other agents have observed Michael Druker driving his truck. Below is a chart depicting information received from the GPS tracker on Druker's truck demonstrating that he frequently travels to the area of **1621 Montgomery Drive**.

<u>MONTH</u>	<u># OF TIMES TRAVELED TO THE AREA OF 1621 MONTGOMERY</u>	<u># OF DAYS TRACKED IN MONTH</u>
--------------	---	---------------------------------------

October	17	14
---------	----	----

November (1-20)	17	15
-----------------	----	----

30. On November 14, 2007, I applied for and was granted State of California scan warrant #503-07 by San Diego County Superior Court Judge Joel Pressman, authorizing a Forward Looking Infrared (FLIR) scan of **3220 Gopher Canyon Road**.

31. On November 15, 2007, pursuant to the state FLIR scan warrant, San Diego Police Officer Kevin Means conducted this FLIR. After reviewing the video of the FLIR, Officer Means opined there was an unusual amount of heat emitting from a window that was located to the right of the front

1
2 door. There was also an unusual amount of heat emitting from two windows on the backside of the
3 house, directly across from the warm window on the front of the house. Portions of the roof area
4 between the warm windows on both sides of the house were slightly warmer than other areas of the roof.
5 Means concluded that these types of heat anomalies are consistent with venting at an indoor marijuana
6 cultivation operation.

7 10241 EAGLE ROCK AVENUE INVESTIGATION

8 32. Referring back to the citizens complaint (as discussed in paragraph 10 of this Affidavit),
9 one of the license plates given to Detective Dinger by the concerned citizen was California license plate
10 number 7H77011. This license plate is assigned to a 2003 Ford pick-up truck registered to Bela R.
11 Bartanyi at **10241 Eagle Rock Avenue**. According to California Department of Motor Vehicles, Bela
12 R. Bartanyi has been the registered owner of that 2003 Ford pick-up since 2004. According to property
13 records, Bartanyi is the owner of **10241 Eagle Rock Avenue**.

14 33. SDG&E records reveal Bela Bartanyi is the current utility subscriber at **10241 Eagle**
15 **Rock Avenue** since May 23, 2005.

16 34. I identified Bela Bartanyi as having a date of birth of May 24, 1966.

17 35. A criminal records check of Bela Bartanyi revealed that in 2002, he had been arrested
18 for California Health & Safety Code § 11357(b) - possession of marijuana under an ounce. This charge
19 was dismissed and Bela Bartanyi plead to another unrelated charge.

20 36. The following table shows the electrical usage history, in kilowatt-hours per month, at
21 10241 Eagle Rock Avenue, along with four comparable neighborhood residences. I have personally
22 seen these residences used for comparison purposes in the neighborhood and they appear to be similar
23 in size and construction to the residence at 10241 Eagle Rock Avenue.

24 AMOUNT OF KILOWATTS UTILIZED

25 DATE	10241 26 <u>Eagle Rock</u>	XXX 27 <u>Eagle Rock</u>	XXX 28 <u>Eagle Rock</u>	XXX <u>Eagle Rock</u>	XXX <u>Eagle Rock</u>
27 10/07	1926	315	473	331	295
28 09/07	2079	369	552	605	375
08/07	2480	378	542	677	345

1						
2	07/07	2189	395	446	691	373
3	06/07	1848	385	372	657	279
4	05/07	2103	422	435	687	303
5	04/07	1743	379	400	624	283
6	03/07	1999	427	365	620	296
7	02/07	1779	460	402	719	326
8	01/07	2432	456	404	714	342
9	12/06	2247	418	402	770	358
10	11/06	1966	421	445	801	386

11 37. Based on my training and experience, it is my opinion that the electrical usage at **10241**
12 **Eagle Rock Avenue** shows excessive energy use that was consistent with the amount of electricity
13 required to operate the equipment commonly used for indoor marijuana cultivation, namely, but not
14 limited to, high wattage lights, circulation fans, exhaust blowers, and pump systems. I observed nothing
15 from the outside of the structure that could lead me to account for the extremely high electrical usage.

16 38. On November 14, 2007, I applied for and was granted State of California scan warrant
17 #503-07 by San Diego County Superior Court Judge Joel Pressman, authorizing a Forward Looking
18 Infrared (FLIR) scan of **10241 Eagle Rock Avenue**.

19 39. On November 15, 2007, pursuant to the state FLIR scan warrant, San Diego Police
20 Officer Kevin Means conducted this FLIR. After reviewing the video of the FLIR, Officer Means opined
21 that the front half of the house was noticeably warmer than the back half. There was an unusual amount
22 of heat emitting from the vent at the peak of the roof on both sides of the house. There was an unusual
23 amount of heat emitting from the edges of a large vent or skylight, just behind the peak of the roof.
24 Means concluded that these types of heat anomalies to be consistent with that of an indoor marijuana
25 cultivation operation.

26 **8539 AQUARIUS DRIVE INVESTIGATION**

27 40. On October 1, 2007, I followed Bela Bartanyi from his residence, **10241 Eagle Rock**
28 **Avenue** directly to **8539 Aquarius Drive**. [Agents placed a GPS tracker on Bartanyi's vehicle for a
couple of weeks in August 2007 and it was tracked to **8539 Aquarius Drive** on a few occasions.]

41. Based on my training and experience, it is common for people who cultivate marijuana to frequent their friends' clandestine marijuana cultivation operations. They do this for various reasons, such as, but not limited to, helping each other grow the plants, set up equipment, trade or sell marijuana clones, and/or help with electrical problems. In my experience, marijuana growers often have partners in their marijuana grows.

42. I obtained records from SDG&E which revealed that Scott Sharp has been the current utility subscriber at **8539 Aquarius Drive** since August 15, 2006. Scott Sharp previously listed 10228 Eagle Rock Avenue, in 2003, according to California Department of Motor Vehicles records. Scott Sharp currently has three vehicles registered to him at the **8539 Aquarius Drive** address.

43. The following table shows the electrical usage history, in kilowatt-hours per month, at **8539 Aquarius Drive**, along with four comparable neighborhood residences. I have personally seen these residences used for comparison purposes in the neighborhood and they appear to be similar in size and construction to the residence at **8539 Aquarius Drive**.

DATE	<u>AMOUNT OF KILOWATTS UTILIZED</u>					X	X	X
	8539	XXX	XXX	XXX				
	<u>Aquarius</u>	<u>Aquarius</u>	<u>Aquarius</u>	<u>Aquarius</u>	<u>Aquarius</u>			
10/07	1891	529	420	762	611

1
2 44. Based on my training and experience, it is my opinion that the electrical usage at **8539**
3 **Aquarius Drive** shows excessive energy use that was consistent with the amount of electricity required
4 to operate the equipment commonly used for indoor marijuana cultivation, namely, but not limited to,
5 high wattage lights, circulation fans, exhaust blowers, and pump systems. I observed nothing from the
6 outside of the structure that could lead me to account for the extremely high electrical usage.

7 45. On November 14, 2007, I applied for and was granted State of California scan warrant
8 #503-07 by San Diego County Superior Court Judge Joel Pressman, authorizing a Forward Looking
9 Infrared (FLIR) scan of **8539 Aquarius Drive**.

10 46. On November 15, 2007, pursuant to the state FLIR scan warrant, San Diego Police
11 Officer Kevin Means conducted this FLIR. After reviewing the video of the FLIR, Officer Means opined
12 the front half of the garage was noticeably warmer than the rear half. There was an unusual amount of
13 heat emitting from a vent near the ground at the rear of the garage. Means concluded that these types
14 of heat anomalies are consistent with an indoor marijuana cultivation operation.

15 FINANCIAL/EMPLOYMENT BACKGROUND

16 47. Subpoenaed records from the California Employment Development Department (EDD)
17 show that:

- 18 • Seth Venskus had no wages reported by an employer from the 1st quarter of 2003 to the 1st
19 quarter of 2007. Venskus has not filed for unemployment or disability during this time frame.
20 No other sources of income, except for marijuana cultivation, have been uncovered during the
21 investigation of Venskus.
- 22 • Michael Druker had no wages reported by an employer from the 1st quarter of 2003 to the end
23 of the 1st quarter of 2007 for Michael Druker. Michael Druker has not filed for unemployment
24 or disability during this time frame.
- 25 • I identified Bela Bartanyi as utilizing social security number 568-69-4594. EDD has no
26 records for social security number 568-69-4594.
- 27 • Between the second quarter of 2002 to the first quarter of 2007, employers reported Scott
28 Sharp earned only \$8,912.56.

//

1
2 48. During the course of this investigation, I attempted to locate Michael Druker employment
3 history, the California Employment Development Department does not list an employer or that wages
4 were paid to Michael Druker from the first quarter of 2003 to end of the first quarter in 2007. It is my
5 experience that individuals that operate indoor marijuana grow operations do not have legitimate
6 employment, the profits reaped from growing and selling marijuana are enormous and the maintenance
7 that is required to run multiple marijuana grows operation does not allow for an individual to have
8 enough time to work a legitimate full-time job.
9

10 50. I know from prior and recent investigations, that managers of marijuana grow operations
11 make substantial profits from their marijuana grows. In one recent prosecution, a manager of a large
12 marijuana grow operation operated "fictitious" businesses that were designed and set up to launder his
13 substantial drug proceeds. These businesses were set up in order to legitimize drug proceeds and allow
14 the marijuana grower purchase property on obtain loans. In another prosecution, a manager of a large
15 marijuana grow operation placed his multiple properties in the names of "fictitious" businesses to
16 conceal his assets from the marijuana grows.
17

18 51. A search of Fictitious Business Name filings with the San Diego County Clerks office
19 revealed that Michael Druker registered the factitious business name Ultra Oil for Pets in January 2002.
20 The registration expired in January 2007. Ultra Oil for Pets was a business that was utilized by Damien
21 Andrews to obtain fraudulent bank loans. Damien Andrews plead guilty to manufacturing marijuana
22 plants and money laundering in federal court. In an attempt to legitimize his drug proceeds from
23 marijuana cultivation, Andrews listed his employer as Ultra Oil for Pets on numerous residential loan
24 applications and stated that he made in excess of \$100,000 and listed Michael Druker as his supervisor,
25 in some instances. The evidence showed that Druker was contacted by the lending institutions and
26 Druker would verify information listed on the loan application. During the course of that investigation
27
28

1 it was determined through bank records that Ultra Oil for Pets made a negligible amount of money
2 (under \$6,000 total for calendar year 2006). In fact, Andrews utilized the Ultra Oil for Pets business
3 bank account as a personal account. Ultra Oil for Pets was a company that was utilized by Damien
4 Andrews to legitimize his narcotics proceeds to lending institutions.
5

6 52. A review of the website www.pacificacanecorso.com appears that Michael Druker is
7 operating a dog breeding company, his website says. "In 2002/2003 I launched Ultra Oil for Pets..."
8 Druker later claims that he became a dog breeder though his involvement in Ultra Oil for Pets. Druker
9 states that his business is in Bonsall, CA. A search of the San Diego Assessor's office Fictitious
10 Business names did not reveal a registration for the name Pacifica Cane Corso. A search of the
11 California Secretary of State's corporation and partnership filings also did not reveal any businesses
12 listed under the name Pacifica Cane Corso. The phone number 760-613-5376 that is listed on the
13 website is subscribed to by Michael Druker. I believe that the "Bonsall" location is the **3220 Gopher**
14 **Canyon Road**, Vista, California. Vista and Bonsall are located adjacent to each other.
15

16 53. A search of Fictitious Business Name filings with the San Diego County Clerks office
17 revealed that Bela Bartanyi registered the factitious business name Bela Bartanyi Home and Land
18 Maintenance in March 2004 and has not expired. Bartanyi list the location and mailing address of Bela
19 Bartanyi Home and Land Maintenance as **10241 Eagle Rock Avenue**, San Diego, California 92126.
20 I have conducted surveillance of Bartanyi on several occasions and have never seen Bartanyi perform
21 and home or land maintenance.
22

23 54. I believe that Druker and Bartanyi established fictitious businesses in an attempt to
24 conceal their true business activity which is growing and selling marijuana. It is my experience that
25 drug traffickers establish a business in order to appear that they are not unemployed, yet accumulating
26 wealth and assets.

27 TRAINING AND EXPERIENCE

28 55. Based on my training and experience, I know that persons who are involved in the
cultivation of marijuana become involved in the process over an extended period of time because the
indoor cultivation and distribution of marijuana is an ongoing process.

1
2 56. I know through my training and experience that indoor marijuana cultivation primarily
3 requires the use of hydroponics equipment such as lava rock in lieu of traditional soil methods. The
4 term hydroponics refers to the cultivation of plants by placing the roots in liquid nutrient solutions rather
5 than soil. To conduct this type of cultivation, the following equipment is required; rockwool also known
6 as GroDan (a fibrous material used as a growing medium and substituted for soil; high intensity lights,
7 nutrients, fertilizers; various types of fans, tables, and trays that are specifically designed to facilitate
8 the irrigation of plants; CO2 enrichment systems; electrical timers, and other items that allow for
9 optimum growing conditions.

10 57. I am also aware that indoor cultivators generally utilize a technique known as "cloning"
11 to produce additional plants from clippings from a "mother plant." These clippings are genetically
12 identical to the mother plants. This allows the cultivator to take cuttings from a female plant and ensure
13 the cuttings will develop identical female plants. This type of cultivation produces a seedless marijuana
14 plant known as "Sinsemilla," which has a very high street value and worthy of this expensive
15 investment. In addition, this allows for what is normally an annual plant to be grown year round (three
16 to four crops a year indoors). The cloning process allows for the cultivator to operate on an ongoing
17 basis, capable of producing very high quality marijuana throughout the year. This is further made
18 possible by the utilization of indoor lighting, which, by adjusting the light cycle, allows the cultivator
19 to extend the growing cycle of "mother plants" indefinitely.

20 58. The most common method of growing marijuana indoors is by utilizing hydroponics
21 which refers to the growing of plants in nutrient solution with or without an inert medium, to provide
22 mechanical support. This growing medium is often referred to as Grodan or rockwool and is
23 commercially available. Cultivators will take small cuttings (known as clones) from large female
24 marijuana plants and place them into small cubes or rockwool. These clones will be placed in various
25 specially made tables or trays where water, containing all of the vital nutrients that soil normally
26 contains, will saturate the clones. The water is stored in a reservoir and pumped into the trays
27 containing the plants and automatically drains back into the reservoir.

28 59. The clones are then placed under high intensity lights ranging from 150 to 400 watts.
The lights are generally placed on a timer for 18 hours in a 24-hour period to allow for the plants to
acquire a vegetable growth. In approximately 7-10 days the clones will begin to form roots. As the
plants continue to grow, a higher intensity light is required to obtain optimum light conditions.
Cultivators will use 400 watt and up to 1000 watt lights to provide the plants with enough light to grow

1
2 as if they were outside. These lights use large quantities of electricity. As an example, each 400 watt
3 light adds approximately \$25 and each 1000 watt light adds \$54 to monthly utility bills.

4 60. These lights are often mounted on a mechanical track which allows the lights to slowly
5 move across the plants providing an equal amount of light to all of the plants. Cultivators have been
6 known to mount a multitude of these lights into an enclosed room. This creates tremendous amounts
7 of heat. In some cases, additional equipment is required such as oscillating fans to cool the room and
8 to exercise the plants. CO2 (carbon dioxide) systems are installed to create optimum air conditions for
9 the plants. The CO2 systems allow for optimum plant development and, when properly installed,
10 cultivators can achieve a significant productivity increase from their plants. Ultimately the cultivators
11 are striving to produce colas, the flowering tops of the marijuana plants where the tetrahydrocannabinol
(THC) is mostly concentrated.

12 61. In approximately 10 weeks the cultivator will program the lights to be on 12 hours a day,
13 allowing for 12 hours of darkness. The plants are once again tricked into sensing a seasonal change and
14 they will spend 70 percent of their energy into producing colas for the reproduction. Since the plants
15 are never being exposed to male plants, they will not be pollinated and will not produce seeds (hence
16 the term sinsemilla which means "without seeds." The flowering tops of the marijuana plants are known
17 to cultivator as "buds" and are extremely potent in their THC content. The cultivation of indoor
18 marijuana is a very unique process in that it allows for the cultivator to operate on an ongoing basis that
yields a very high quality product.

19 62. In my experience, documents and business records are frequently maintained by those
20 engaged in the "business" of manufacturing and selling controlled substances. Also, those so engaged
21 will frequently maintain writings, books, business ledgers, lists, notations, and other memoranda to
22 assist them in their criminal enterprises. These materials are created and maintained in much the same
23 way and for the same reasons as persons involved in legitimate business keep similar materials. These
24 documents and business records are frequently kept at the residence that they actually live in. This is
25 done to protect their discovery and seizure by law enforcement if the location being used to cultivate
marijuana is raided by law enforcement.

26 63. In addition, I believe that there will be evidence of money laundering related to the
27 proceeds of their drug trafficking activities (manufacturing of marijuana plants), in violation of Title 18,
28 United States Code, Section 1956. I know from prior and recent investigations that managers of
marijuana grow operations make substantial profits from their marijuana grows. In one recent

1
2 prosecution, where the manager operated two marijuana grow locations but resided at another location,
3 that manager admitted to making at least \$80,000 per month in proceeds from manufacturing marijuana
4 plants.

5 64. Internal Revenue Service Special Agent Jamie Harrison has informed me that he has
6 worked as a Special Agent for approximately 7 years. In this capacity, he has conducted numerous
7 financial investigations involving indoor marijuana cultivation, money laundering, bank fraud, and tax
8 evasion. Based on his experience and training, Agent Harrison stated that small businesses, such as those
9 purportedly owned by Druker and Bartanyi, would maintain a number of books and records in order to
10 conduct their business activity and track their finances. Here, Druker and Bartanyi businesses are
11 purportedly based out their residences, I believe records if any of these businesses would be located at
12 **3220 Gopher Canyon Road** (the primary residence of Drucker) and **10241 Eagle Rock Avenue**
(primary residence of Bartanyi).

13 65. According to Agent Harrison, these books and records would normally include: income
14 tax returns (including Forms 1120, 1120S, 1065, 1040, 940, 941, DE-3); income tax information
15 documents (including Forms 1099, W-2, W-4, K-1), supporting work papers, summary sheets and
16 analyses; documents relating to any corporate audits; corporate journals (including general journals,
17 cash receipts journals, cash disbursement journals, sales journals, purchase journals and payroll
18 journals); general and subsidiary ledgers (including payroll, accounts receivable, accounts payable,
19 purchases); chart of accounts, adjusting and closing entries, year end trial balances, corporate minutes,
20 bylaws and Articles of Incorporation; employee lists and employee contracts; documents showing the
21 receipt or disbursements of cash (including records of royalties, credit card statements and receipts,
22 invoices, records of commercial storage, cash reconciliation's, and records regarding any purchase or
23 sale of assets); loan documents to or from shareholders and related entities with payment history; other
24 loan documents; inventory records; financial statements; contracts (including contract bids and
25 proposals); mortgage records or other documentation supporting conveyances and/or ownership of
26 property; documents and records relating to other corporations, limited liability companies, partnerships
27 and other entities which have related ownership.

28 67. IRS Special Agent Jamie Harrison stated that Ultra Oil for Pets, Pacifica Cane Corso,
and Bela Bartanyi Homae and Land Maintenance, would also normally maintain records related to their
banking activity (including bank statements, check registers, passbooks, deposit and withdrawal slips,
cancelled checks, certificates of deposit, notes, account applications, negotiable instruments, safety

1
2 deposit box records and keys, money drafts, letters of credit, money orders, cashiers' checks and receipts
3 for same, bank checks, wire transfers and bank reconciliations). I believe that any of these items will
4 be found at **3220 Gopher Canyon Road** and **10241 Eagle Rock Avenue**.

5 68. Based upon conversations with IRS Special Agent Jamie Harrison, and my training and
6 experience, I am aware that owners, managers and operators of businesses keep records at their offices.
7 Here, I believe that they would be found at **3220 Gopher Canyon Road** and **10241 Eagle Rock Avenue**
8 for Druker and Bartanyi, respectively because the GSP tracker (Druker) and physical surveillance
9 (Bartanyi) their vehicles do not travel to an office on a regular basis. These records include various
10 Accounting Journals (e.g., Sales, Purchase, Sales Returns and Allowance, Adjusting Journals) and
11 Business Ledgers (e.g., General, Accounts Payable, Accounts Receivable, Payroll and Subsidiary
12 Ledgers). In addition, I know that businesses also frequently maintain a variety of records to manage
13 their payroll, inventory and tax situation. Similarly, they must also maintain various financial records
14 such as contracts, bank statements, cancelled checks, invoices and sales receipts in order to conduct their
normal business activities

15 **BASIS FOR EVIDENCE SOUGHT IN SEARCH WARRANT**

16 69. Based upon my experience and training, consultation with other law enforcement officers
17 experienced in drug and financial investigations, and all the facts and opinions set forth in this affidavit,
I know that:

18 a. Individuals involved in growing/dealing marijuana will often maintain at their
19 residence and other buildings and/or vehicles on their residential property, laboratory equipment,
20 chemicals used to manufacture controlled substances, quantities of controlled substances, as well as
21 paraphernalia for packaging, weighing, cutting, testing, distributing, and identifying controlled
22 substances.

23 b. Individuals involved in drug dealing and drug manufacturing often maintain at
24 their residence, and other buildings and/or vehicles on their property, records and ledgers evidencing
25 their trafficking activities in order to keep track of the manufacturing, ordering, purchasing, storage,
26 distribution and transportation of chemical, laboratory equipment and/or drugs. At times, the drugs may
27 be sold, but documentary records and ledgers often remain for long periods of time to memorialize past
28 transactions, the status of accounts receivable and accounts payable, and the names and telephone
numbers of suppliers, customers and co-conspirators. These records are often maintained not only on
paper, but also as computer data in the form of computer hardware and software.

1
2 c. Individuals involved in drug dealing and drug manufacturing must often rely on
3 others to obtain the drugs and to help them market the drug and evidence of the identities of these
4 criminal associates is often maintained at their residence, and other buildings and/or vehicles on their
5 residential property.

6 d. Based on prior searches of premises used by individuals involved in drug dealing
7 and drug manufacturing, I believe I will find articles of personal property evidencing the identity of
8 persons occupying, possessing, residing in, owning, frequenting or controlling the premises or property
9 therein.

10 e. Individuals involved in drug dealing and drug manufacturing will often conceal
11 evidence of their drug dealing in vehicles outside their residence in order to prevent detection and
12 seizure by officers conducting scan warrants at the residence. Therefore, I am requesting permission
13 to scan any vehicle parked at or near the above-described location provided it can be connected to an
14 occupant of the premises by way of admissions, keys, photographs, Department of Motor Vehicles
documents, insurance papers, or repair receipts.

15 f. Individuals involved in drug dealing and drug manufacturing, earn sums of money
16 and often try to legitimize these profits. In order to do this they attempt to secret, transfer and conceal
17 the money by, among other ways: (1) placing assets in names other than their own to avoid detection
18 while maintaining control; (2) laundering the money through what appears to be a legitimate business
19 or businesses; (3) hiding money in their homes, business locations, safes and safety deposit boxes; or
20 (4) using the money to buy assets which are hard to trace. Records of these transactions are often found
at their residence, and other buildings and/or vehicles on their residential property.

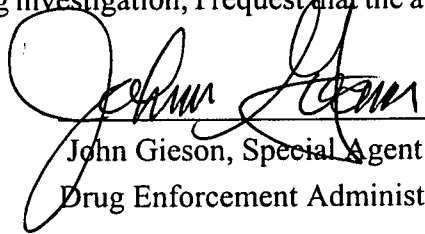

21 g. Individuals involved in drug dealing or drug manufacturing will often maintain
22 weapons, firearms and ammunition on their person or at their residence and cars in order to protect
23 themselves and guard their drugs and drug profits, and for enforcement purposes during their drug
24 dealings. These weapons and firearms are used and can be used as an instrumentality of the crime of
25 possession and distribution of drugs. Therefore, I am requesting permission to seize weapons, firearms
26 and ammunition that may be found at the above-described target location.

27 70. It is also my opinion and belief that the above-described documents are currently
28 possessed by drug dealers/manufacturers much the same way a legitimate business will maintain records
and tools of its trade whether or not the business has a particular item in inventory on a given date.
These documents are kept by drug dealers/manufacturers whether or not the dealer/manufacturer is in

1
2 possession of any drugs/chemicals at any given moment. I believe that the seizure of such documents
3 will provide evidence of the events set forth in this affidavit and that such documents can be found at
4 the target location despite any lapse of the time between the events described and the anticipated scan
5 pursuant to this warrant.

6 71. Based upon the foregoing facts, the affiant has reason to believe that the items identified
7 in Attachment B are located at: (1) **1621 Montgomery Drive**, Vista, California; (2) **3220 Gopher**
8 **Canyon Road**, Vista, California; (3) **10241 Eagle Rock Avenue**, San Diego, California; (4) **8539**
9 **Aquarius Drive, San Diego**, California.

10 72. Because this is an ongoing investigation, I request that the affidavit remain sealed under
11 further order of the Court.

12 
13 John Gieson, Special Agent
14 Drug Enforcement Administration

15 Subscribed and sworn to before me this 21st day of November, 2007.

Attachment A

10241 Eagle Rock Avenue, San Diego, is further described as a single-story, single-family residence having gray colored stucco with green colored trim and having the numbers "10241" posted on the eve above the left side of the garage.

ATTACHMENT B

1. Documents relating to or memorializing the cultivation and distribution of marijuana, including U.S Currency, buyer lists, seller lists, pay-owe sheets, records of sales, log books, drug ledgers, ~~computers and computer equipment~~, ~~computer software~~, personal telephone/address books, including electronic organizers, rolodexes, telephone answering pads, bank and financial records, and storage records, such as storage locker receipts and safety deposit box rental records. ⑬ JMA
2. Articles of personal property relating to the existence of a scheme to cultivate and distribute marijuana, including personal telephone/address books, including electronic organizers, telephone bills, photographs, and papers and documents containing lists of names and/or numbers of individuals involved in the possession and sale of marijuana.
3. Documents and articles of property relating to the identity of persons occupying, possessing, residing in, owning, frequenting or controlling the premises to be searched or property therein, including keys, door locks, rental agreements and records, property acquisition records, utility and telephone beepers or paging devices, rolodexes, telephone answering pads, storage records, vehicle and/or vessel records, canceled mail envelopes, correspondence, financial documents such as tax returns, bank records, safety deposit records, canceled checks, and other records of income and expenditure, credit card and bank records, travel documents, personal identification documents, and documents relating to obtaining false identification, including birth certificates, drivers license, immigration cards and other forms of identification in which the same person would use other names and identities other than his or her own.
4. Equipment used to cultivate marijuana, marijuana plants, processed marijuana, as well as paraphernalia for packaging, weighing, cutting, testing, distributing and identifying controlled substances.
5. Weapons and/or firearms.
6. Documents and records including income tax returns (including Forms 1120, 1120S, 1065, 1040, 940, 941, DE-3); income tax information documents (including Forms 1099, W-2, W-4, K-1), supporting work papers, summary sheets and analyses; documents relating to any corporate audits; corporate journals (including general journals, cash receipts journals, cash disbursement journals, sales journals, purchase journals and payroll journals); general and subsidiary ledgers (including payroll, accounts receivable, accounts payable, purchases); chart of accounts, adjusting and closing entries, year end trial balances, corporate minutes, bylaws and Articles of Incorporation; employee lists and employee

contracts; documents showing the receipt or disbursements of cash (including records of royalties, credit card statements and receipts, invoices, records of commercial storage, cash reconciliation's, and records regarding any purchase or sale of assets); loan documents to or from shareholders and related entities with payment history; other loan documents; inventory records; financial statements; contracts (including contract bids and proposals); mortgage records or other documentation supporting conveyances and/or ownership of property; documents and records relating to other corporations, limited liability companies, partnerships and other entities which have related ownership.

7. Records related to their banking activity (including bank statements, check registers, passbooks, deposit and withdrawal slips, cancelled checks, certificates of deposit, notes, account applications, negotiable instruments, safety deposit box records and keys, money drafts, letters of credit, money orders, cashiers' checks and receipts for same, bank checks, wire transfers and bank reconciliations).
8. Records include various Accounting Journals (e.g., Sales, Purchase, Sales Returns and Allowance, Adjusting Journals) and Business Ledgers (e.g., General, Accounts Payable, Accounts Receivable, Payroll and Subsidiary Ledgers). In addition, I know that businesses also frequently maintain a variety of records to manage their payroll, inventory and tax situation. Similarly, they must also maintain various financial records such as contracts, bank statements, cancelled checks, invoices and sales receipts in order to conduct their normal business activities.
9. Records also include audio recordings, video recordings, telephone answering machine recording, memoranda, correspondence, diaries, notes, address books, day planners, calendars, appointment books, newspaper clippings, articles, books, financial institution records, checks, cashiers' checks, money orders, wire transfer records, deposit slips, ATM receipts, certificates of deposit, safety deposit slips, withdrawal slips, monthly and quarterly statements, stock certificates, bonds, bearer instruments, notes, money market account statements, negotiable orders of withdrawal, account documents, letters of credit, passbooks, drafts, title documents, mortgage and loan documents, property records, storage agreements and bills, storage locker keys, vehicle registration and ownership documents, asset ownership records, journals, ledgers, code sheets, financials, budgets, proposals, plans, contracts, agreements, bills of sale, delivery records, invoices, receipts, documentation of conveyances, deeds, and credit card bills and other papers. These records may be in many forms such as paper, electronic, or in code. I know from my experience that businesses use such software as Quickbooks and Microsoft Money to manage their finances and track their investments.

10. All information to be seized to evidence ~~the~~ (JMA)
 violations of Title 21 USC 841(a)(1), 846(a)(1) manufacturing
 of a controlled substance to wit MARIJUANA AND
 MARIJUANA PLANTS AND TITLE 18 USC 1956 MONEY
 LAUNDERING.

ATTACHMENT C
SDPD PO Kevin Means
Training and Experience On Thermal Imaging

1. 26 years with the San Diego Police Department.
2. SDPD Narcotics Investigator for 2 ½ years
3. 18 years as a pilot and Tactical Flight Officer with the San Diego Police Air Support Unit.
4. Infrared (FLIR) operator for 16 years.
5. 1993 – Attended DEA/DOJ Thermal Imaging school – Certified Thermographer.
6. 1994 – Attended the Law Enforcement Thermographers Association (LETA) thermal imaging school.
7. Was certified by LETA as thermal imaging instructor.
8. Authored the POST Certified thermal imaging course entitled “Airborne Infrared – Tactics and Operations.”
9. Primary instructor for the Airborne Law Enforcement Association (ALEA) Airborne Thermal Imaging class since 1996
10. Primary instructor for the ALEA Thermal Imaging Instructor course.
11. Taught airborne imaging to hundred of students throughout the United States including; U.S. Customs, U.S. Border Patrol, DEA and dozens of municipal law enforcement agencies. Was retained to brief the government of the Dutch Antilles on the abilities of airborne thermal imagers.
12. Thermal Imaging instructor for DOJ’s Southwest Regionl for law enforcement technology.
13. Instructor for the legal portion of the California Highway Patrol (CHP) Post Aircrew Course on thermal imaging.
14. Toured the FLIR Systems, Inc. (FSI) factory 4 times in past 10 years.

15. Consulted with FSI and Wescam on the design of airborne thermal imaging systems.
16. Designed and patented an infrared/searchlight slaving system.
17. Authored articles in various law enforcement publications (Law Enforcement Quarterly, AirBeat, etc.) on the abilities and inabilities of thermal imaging.
18. Have performed dozens of thermal scans on suspected indoor grows for agencies throughout San Diego County.
